

## Unbound Genius

### Replace Your Struggle with Your Spark

*Powerful ways to uncover your sparks of genius and harness them for growth.*

**Program Delivery:** Live Presentation | Virtual Keynote | Live Streaming | Webinar

#### This program is perfect for:

- Employee motivation and performance optimization.
- Executives and leadership teams who want to improve performance and productivity.

#### The audience will leave with:

- **Quantitative Research** to understand how the brain responds in times of stress and when tapped into its genius to improve your performance under any circumstance.
- **Practical Tools** to uncover your sparks of genius now.
- **Your Personal Plan** to lean into your strengths for greater work and life satisfaction.
- **Greater Understanding** of how to lead and interact with diverse colleagues and their unique sparks of genius.

*Each attendee will receive an Unbound Genius workbook filled with exercises to reveal their sparks of genius and tools to lean into their strengths.*

We are out of touch with our sparks of genius! If you ask children what they're good at, they'll rattle off a list of things without pause. By the time we're adults, however, we've been taught how we "should" do things, and we've built our work and our days based on the modeling we've received from others. This causes us to lose touch with our inherent brain wiring and strengths, which leads to lower performance and less life satisfaction.

Join performance optimization and workplace satisfaction strategist Elle O'Flaherty in this high-power keynote, where she explores neuroscience research, tools to connect with your untapped potential, and a practical approach to realign your life to your strengths. By understanding why and how your brain likes to work, you will transform areas of struggle into satisfaction. Your new learning will also help you understand those around you and draw out their best.

This keynote has it all - energy, engagement, and a personal plan of action for every attendee.
